The Game of Euro Matching

Payoff A, B

		Player B	
		H	T
Player A	H	1, -1	-1, 1
	T	-1, 1	1, -1

2-Person game

Each turn, the players simultaneously make a choice without knowing the other's choice.

The payoff matrix determines the scores.

E.g. if A chooses H(eads) and B chooses T(ails), then A loses 1 and B gains 1.

Try some games.

Player A		Player B	
Choice	Score	Choice	Score
