

Sponsoring the SCEE2002 Conference

S.H.M.J. Houben

The 4th International Conference on Scientific Computing in Electrical Engineering SCEE2002 will be organised from 23 to 28 June, 2002, in Eindhoven, The Netherlands. This conference, which has been organised twice before as a German conference and in 2000 as an international conference, will again aim at an international audience. We aim to reach both mathematicians and electrical engineers, both from industry and from the academic world.

The SCEE2002 conference will address the following topics.

- Computational electromagnetics
- Computational electrodynamics
- Circuit simulation
- Coupled problems

On Tuesday, June 25, a special Industry Day will be organised, in which people from industry are asked to give their opinion on what research is needed in the near future. Also, there will be presentations about successful co-operations between industry and universities. In this way, we hope to foster such co-operations and show that research is driven by industrial needs.

For more information, see our web-site at <http://www.win.tue.nl/scee2002>.

We want to offer companies the opportunity to sponsor the SCEE2002. There are two types of sponsoring.

1. Basic sponsoring

- Display of company name, logo and URL on web site. This information will remain on the web-site for at least until December 31, 2002.
- Display of company name, logo, URL and address in program book.
- Inclusion of company's material (folders, leaflets) in the conference bag.

2. Demonstration stand

A demonstration stand always includes basic sponsoring.
