

# celonis

## Data

## Scientist

(m/f) Fulltime, Munich

### Are you ready for a new challenge?

You demonstrate our innovative products in front of our clients' employees and executives, you identify and address their individual needs. You accompany the newest proof-of-concept projects and fill our software with the real time data of our customers (for instance out of ERP systems, such as SAP). You use the most up-to-date extraction and transformation methods to rule over the giant data flows and harmonise those. You actively use the Celonis Process Mining software to provide transparency over highly complex digital business processes and consult our clients regarding these.

- ✓ You've successfully completed your studies in Computer Science / Maths / Physics or something adequate
- ✓ You've already gained relevant work experience in the area of consulting or IT products with need of explanation
- ✓ You've got excellent analytical skills, you are always well structured and are known for being a quick learner
- ✓ You have fun evaluating complex data, as well as supporting customers
- ✓ You are excited about Big Data, Data Mining and Process Mining
- ✓ You are very dedicated, dynamic and visionary
- ✓ You are looking for a product that you can develop with passion and drive
- ✓ You have very good English skills, Dutch is an advantage

### Are we the right company for you?

- ✓ We are visionary, dynamic and one of the fastest growing enterprise software start-ups in the world
- ✓ We offer the world's most powerful tool for analyzing and optimizing IT-supported business processes and data volumes
- ✓ We are pioneers and market leader in the area of Process Mining
- ✓ We are distinguished by a unique combination of innovative start-up atmosphere and an incredible passion for technology, combined with great professionalism and self-responsible work
