

Providing a Shared BPM Infrastructure in the Cloud for Municipalities

Configurable Services for Local Governments (CoSeLoG)

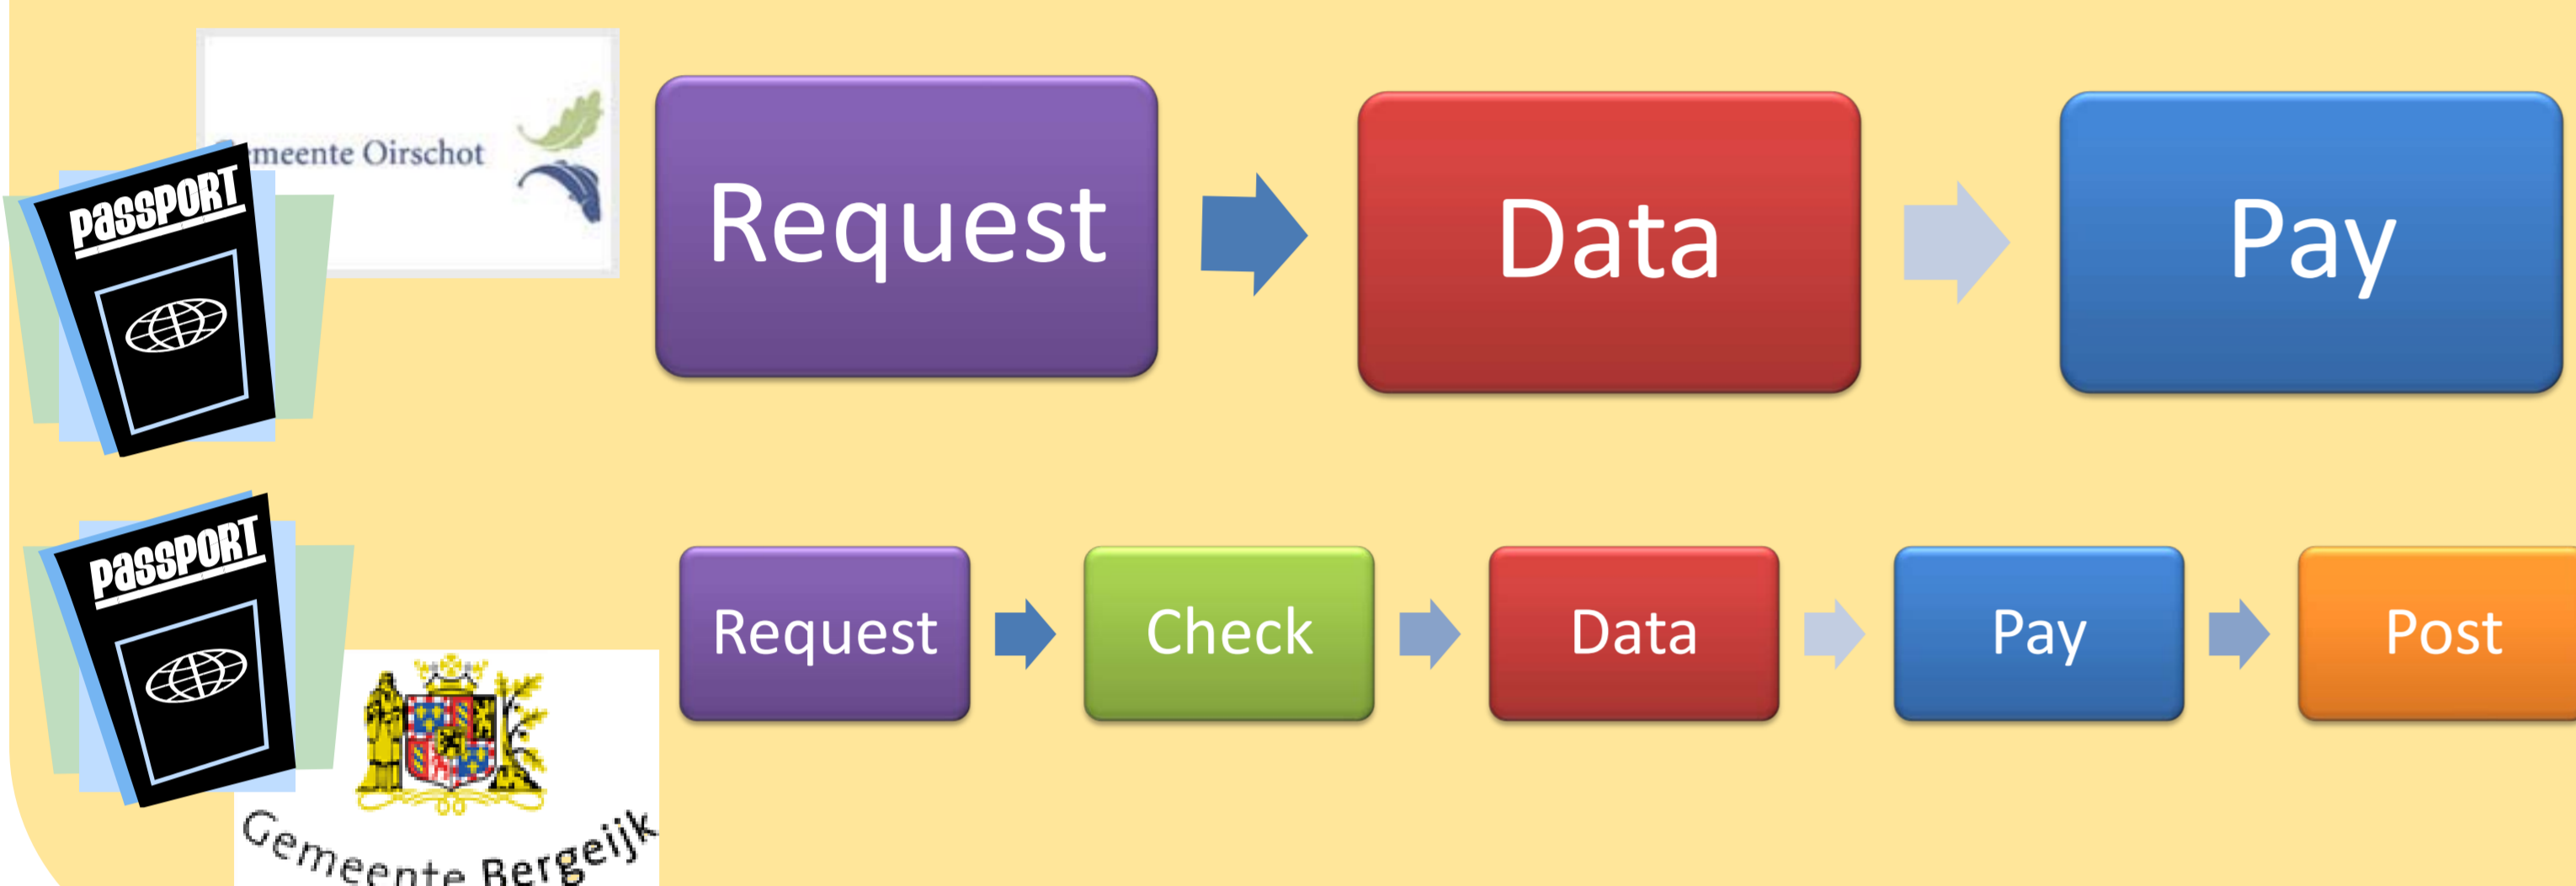

W.M.P. van der Aalst, J.C.A.M. Buijs, B.F. van Dongen,
H.A. Reijers, D.M.M. Schunselaar, H.M.W. Verbeek

D!MPACT **perceptive**software

The problem

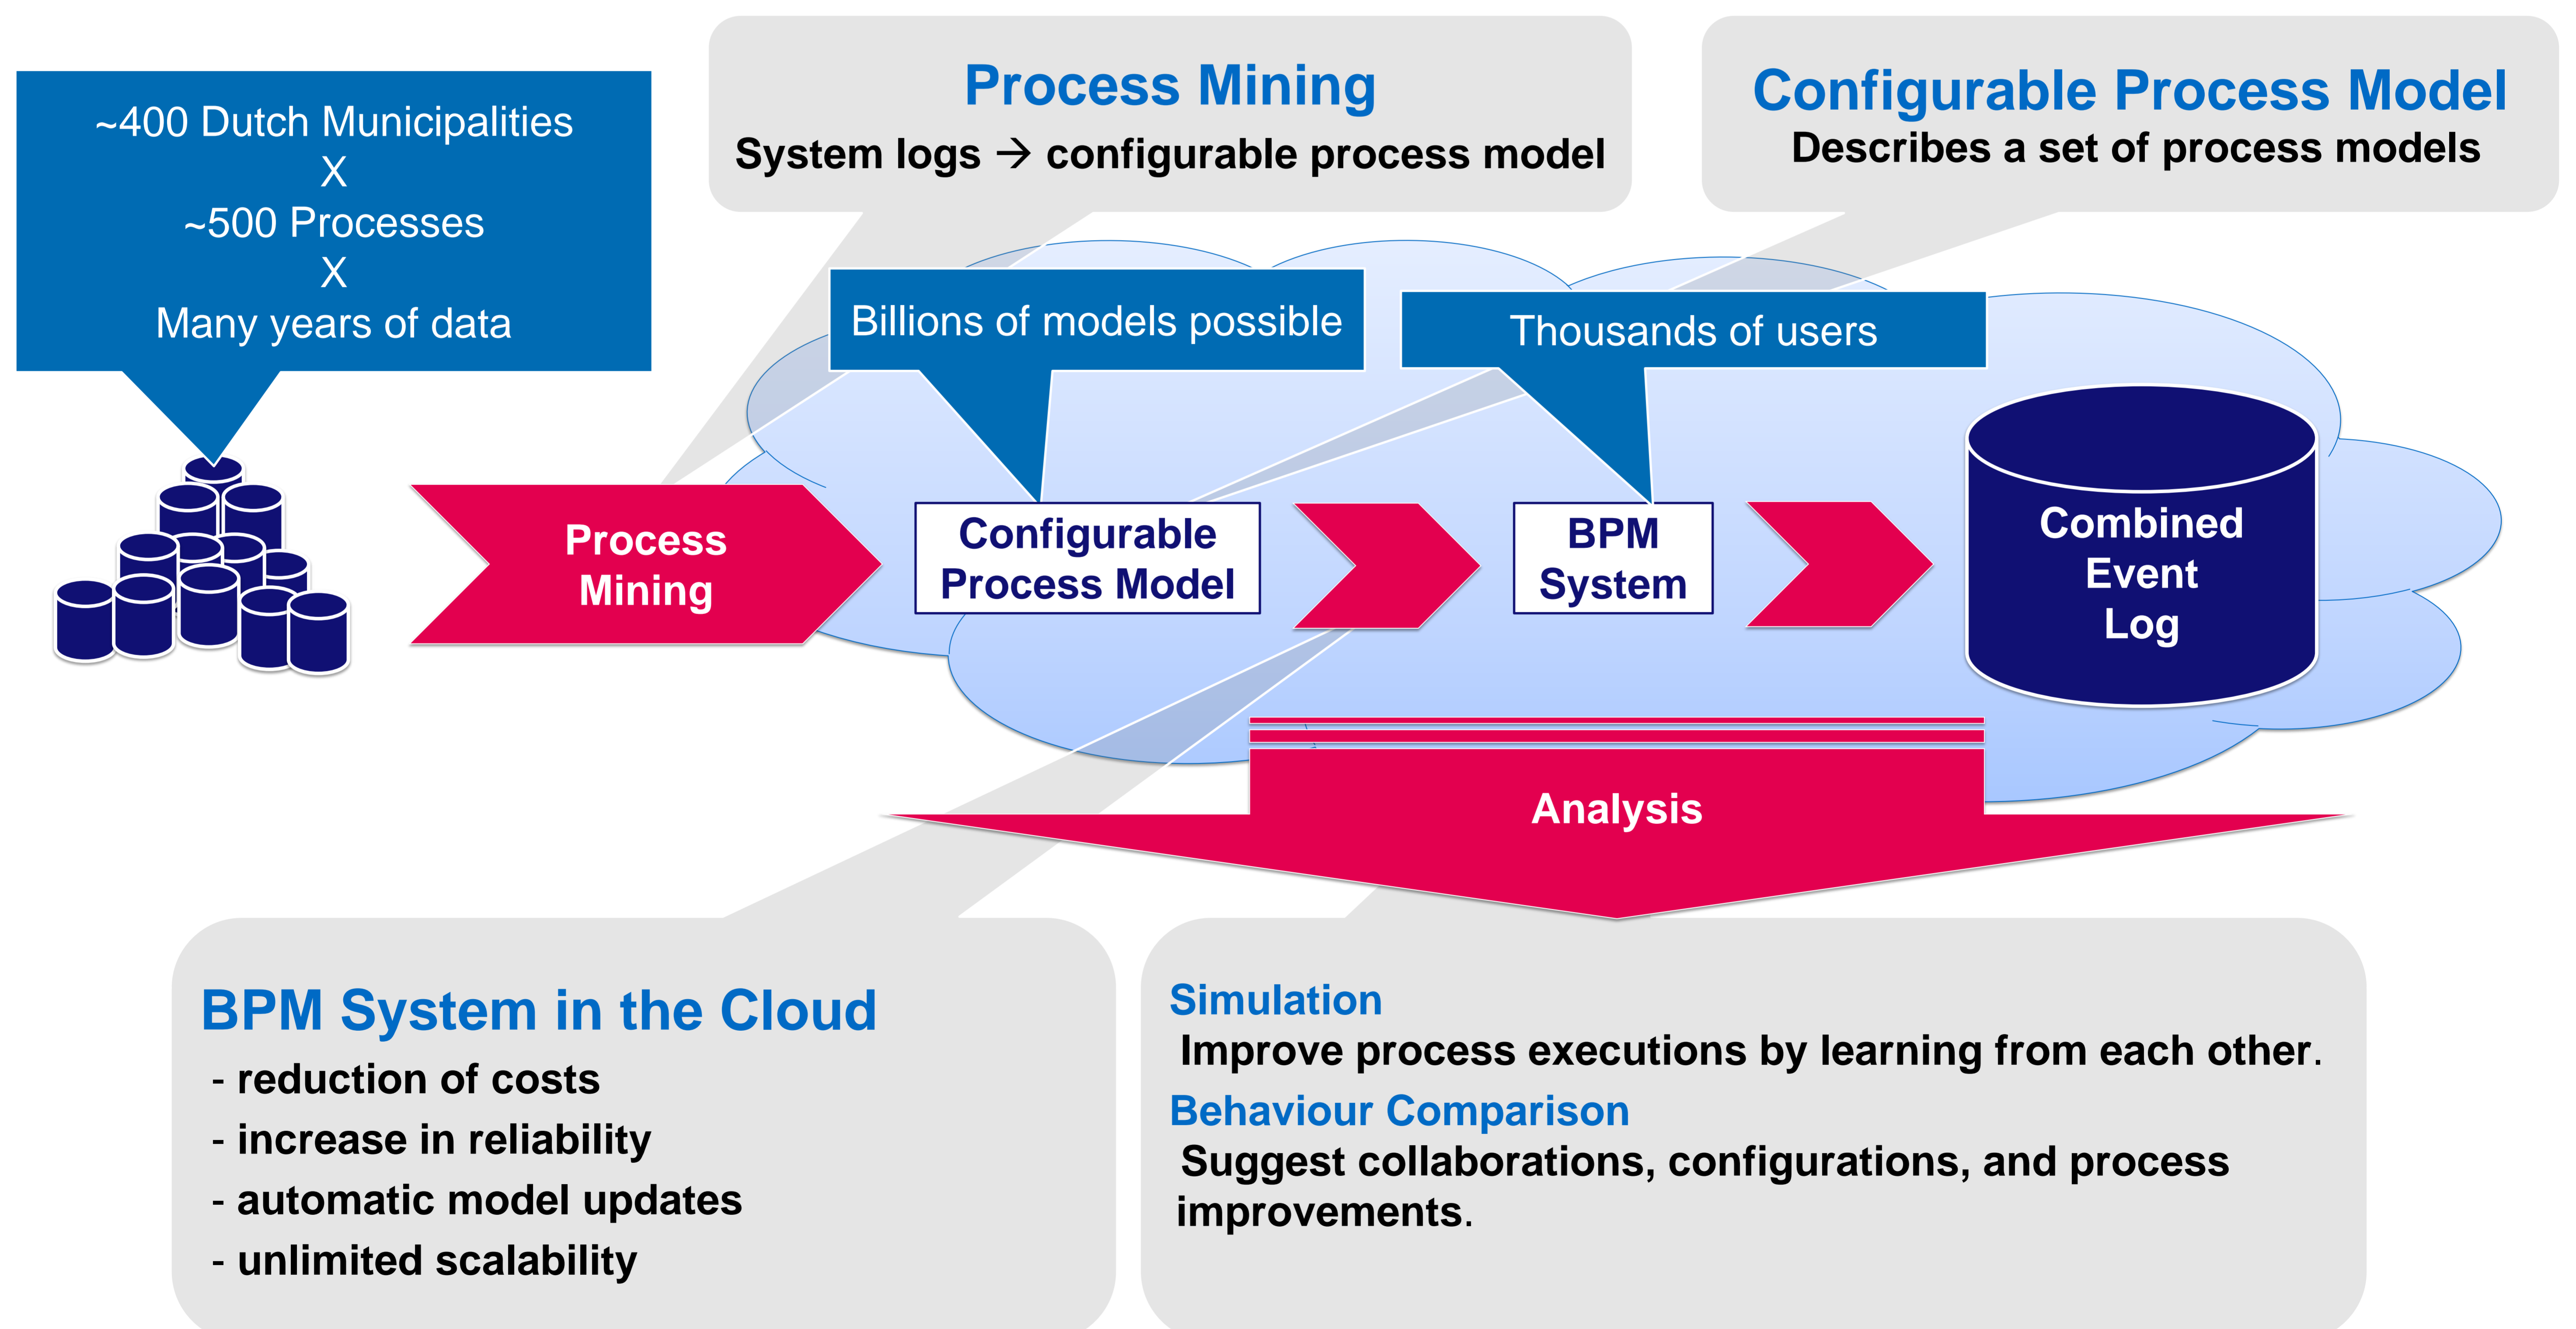

Multiple branches, same services, different process models.

The solution

The CoSeLoG project provides different techniques to support the “colour locale” of different branches whilst offering standardisation and advanced analysis techniques. It is deployable in the cloud and combines unlimited power with standardised comparable data for automated, on-the-fly comparisons and improvements by pressing a single button.

Advanced Support for Process Variations
