

Facility Logistics Management

Ivo Adan

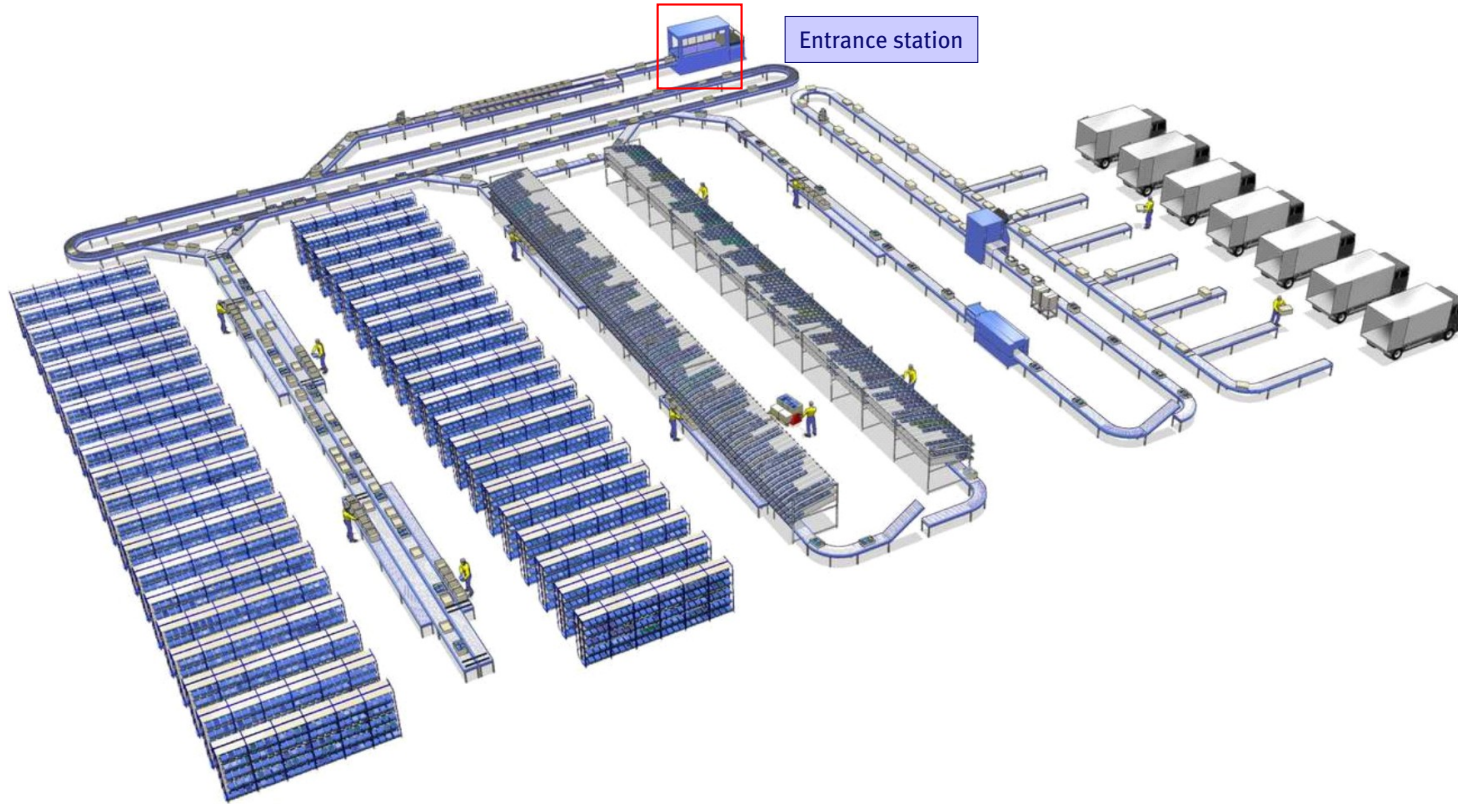

Organization

- **Course material**
 - Teams
 - <http://www.win.tue.nl/~iadan/flm>
- **Examination**
 - Individual take home assignment (35%)
 - Assignment due **April 30**
 - Send assignment as PDF file by email to iadan@tue.nl
- **Contents**
 - Single-station queueing systems
 - Multi-station flow lines
 - Open queueing networks
 - Closed queueing networks
 - Warehousing applications

Zone-Picking System

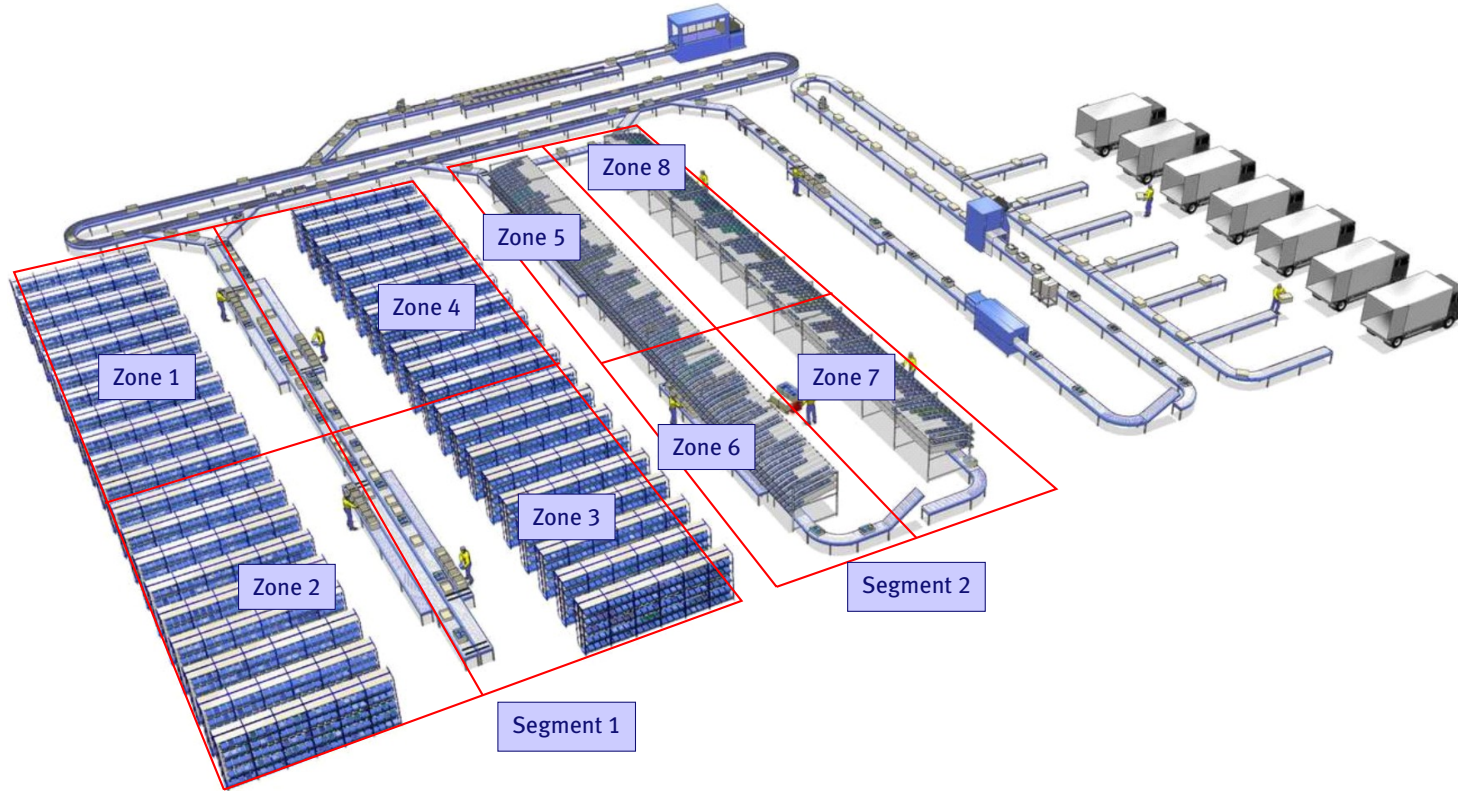

Zone-Picking System

Zone-Picking System

Zone-Picking System

Zone-Picking System

Zone-Picking System

Zone-Picking System

Zone-Picking System

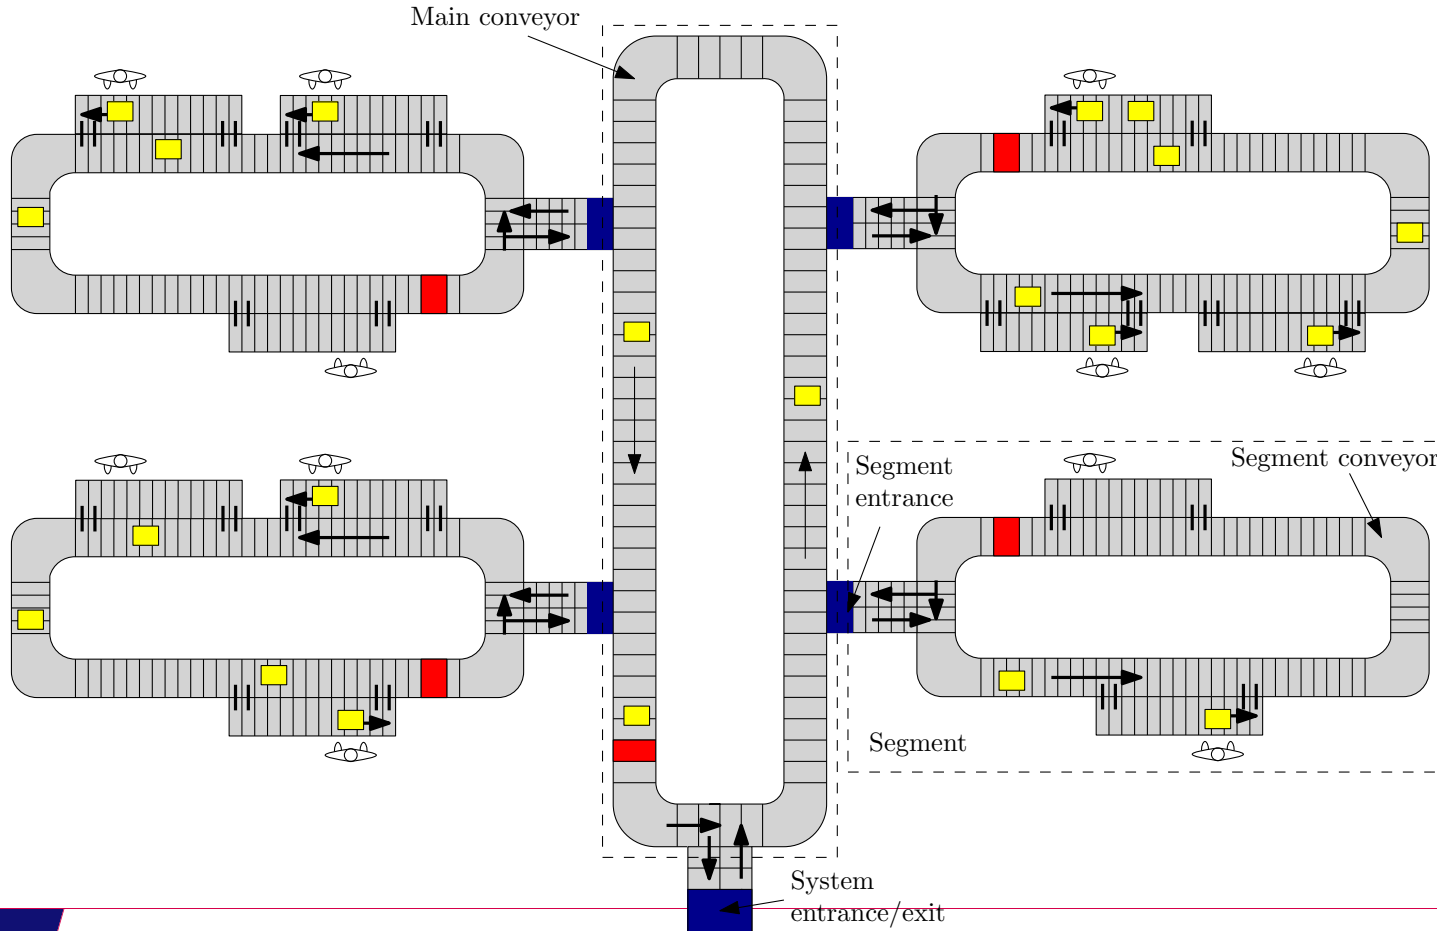

Zone-Picking System

Zone-Picking System

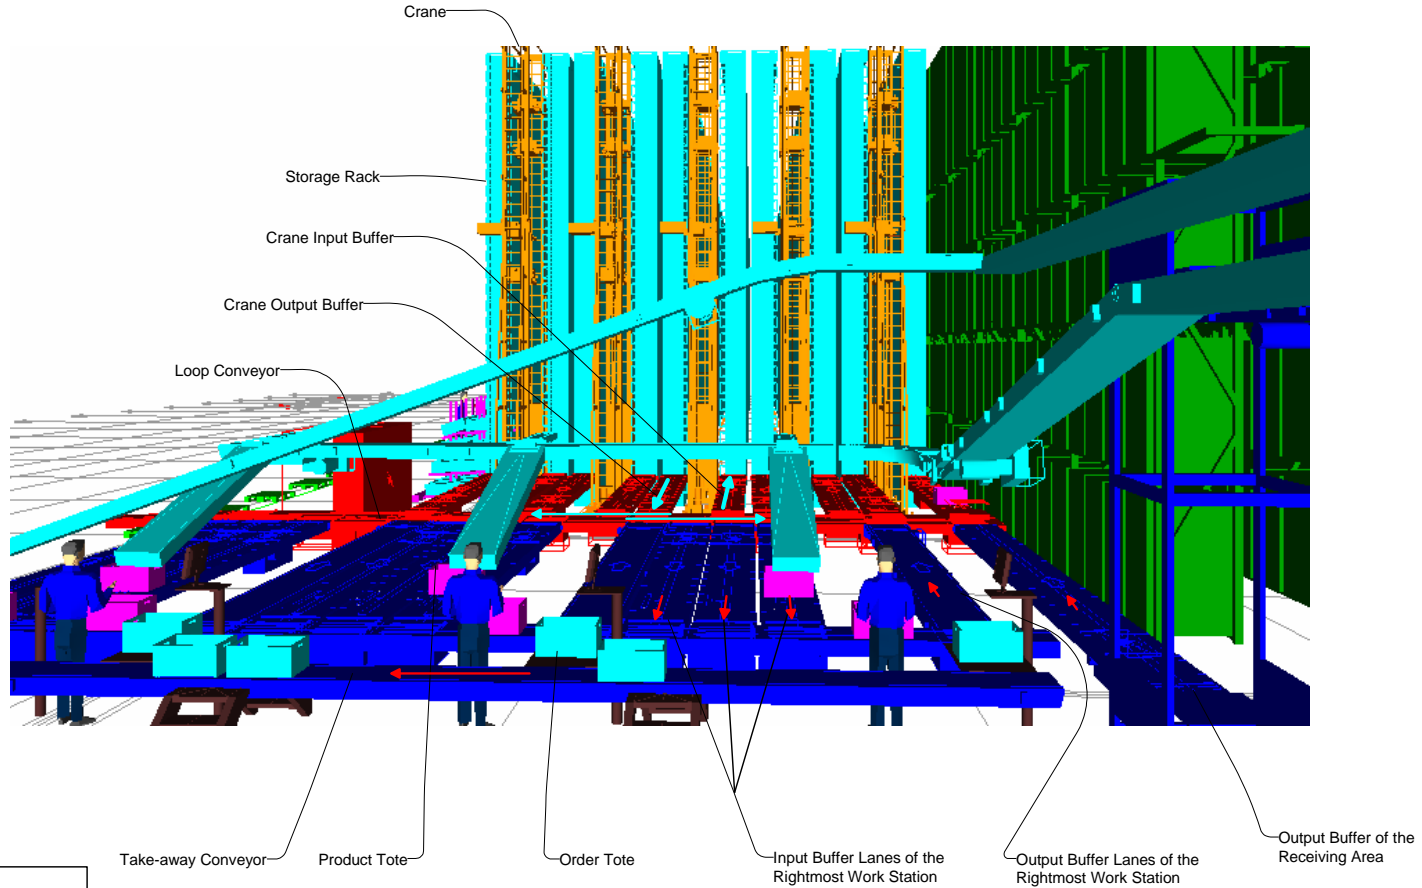

Zone-Picking System

Zone-Picking System

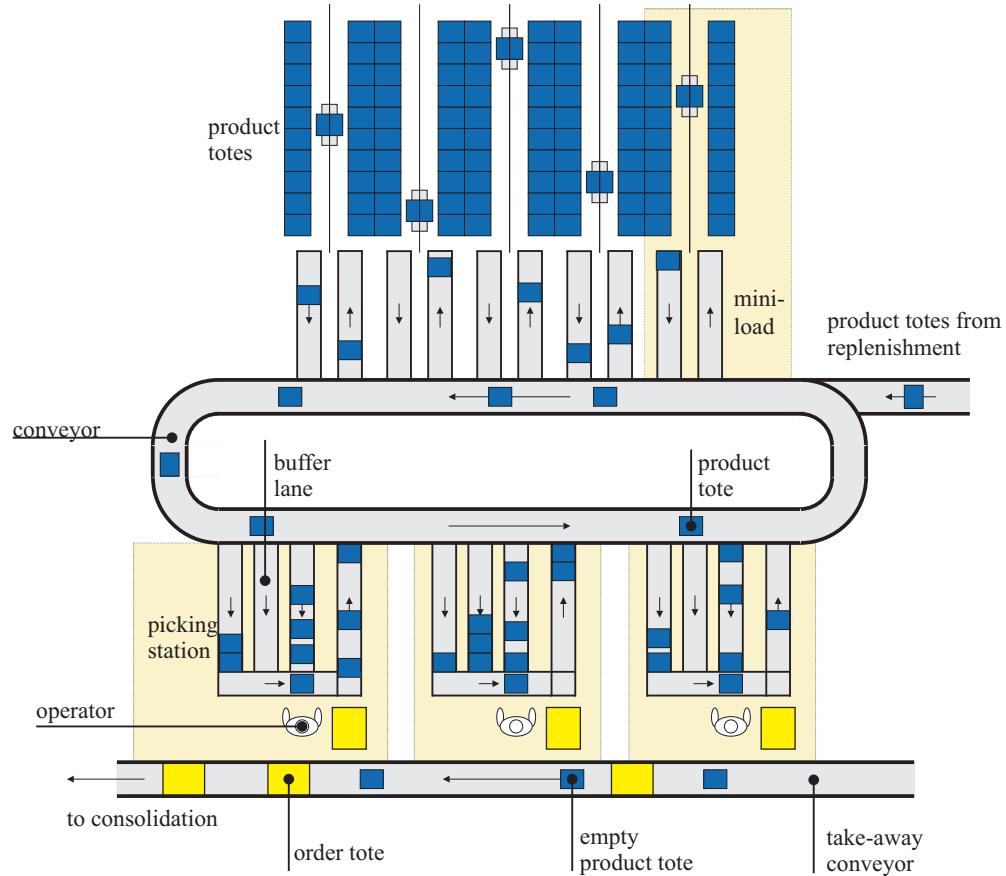

- **Key features**
 - Man-to-goods solution
 - Work-load control at multiple levels
 - Limited buffer space at zones
 - Recirculation (on main and local loops)
- **Design issues**
 - Layout of the network
 - Number and size of zones
 - Location of items
 - Number of pickers
 - Required WIP level

Compact picking system

Arrows indicate the moving direction of the conveyor.

Compact picking system

Compact picking system

- **Key features**
 - Goods-to-man solution
 - Work-load control per picking station
 - Batch service of cranes
- **Design issues**
 - Required pipeline level
 - Number of picking stations
 - Number of mini-loads and batch size

KIVA system

Kiva robot

Operating in warehouse

- **Key features**
 - High throughput capability, flexibility and scalability
- **Design issues**
 - Number and routing of robots
 - Storage location of racks
 - Number and location of pick locations

Answer of VDI: ADAPTO

- 3D automated shuttle system developed by Vanderlande Industries (VDI)
- Design issues
 - Control of shuttles (central or autonomous)
 - Layout (number of cross aisles, intermediate buffers, lifts)

Container terminal

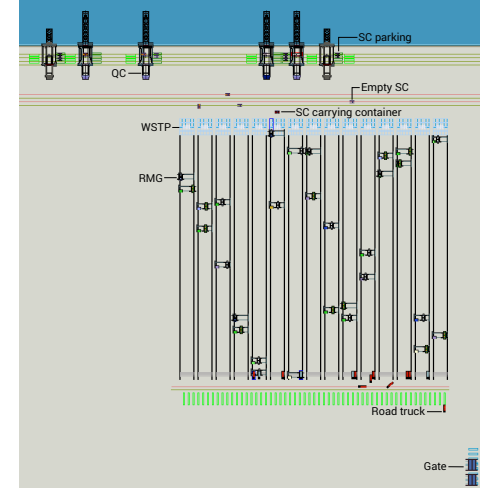

Straddle carrier

Container terminal

Schematic layout

- Design issues

- Number of quay cranes
- Number of straddle carriers

Robotic Dairy Barn

Milking robot

Schematic layout

- Design issues

- Number of robots
- Number and location of feeders, troughs, drinking places, cubicles
