

General Comments SR phase

/Department of Mathematics and Computer Science

Who are the “stakeholders” of:

- Technical documents:
 - URD, SRD, ...;
 - ATP, STP, ...;
- Management documents:
 - SPMP, SQAP, SCMP

/department of mathematics and computer science

Deliverables on Studyweb

- Creating (sub-) directories should be possible by now...
- “Hand-in” directory
- Sub-directory per phase, containing *all* deliverables:
 - technical;
 - [updated] managerial.

/department of mathematics and computer science

Status of previous phase (UR)

- Status deliverables:
 - URD
 - ATP
- Tracking information (SPMP):
 - more/less time required
 - status of deliverables/reviews
 - (problems encountered)

/department of mathematics and computer science

Deliverables of SR phase

- Technical documents:
 - SRD;
 - STP;
 - ATP* (an update to cover GUI);
- Management documents:
 - SPMP*, SQAP*, SCMP* (updates for *next* phase: AD).
- *For all groups at least 1 doc was lacking...*

/department of mathematics and computer science

Technical Documents of SR phase

- What is needed for the SRD (+ STP)?
 - Logical models:
 - *structure*: class diagram;
 - *behavior*: sequence diagrams and state transition diagrams;
 - GUI (+ state transition diagram);
 - (use cases);

/department of mathematics and computer science

SRD of SR phase

- Logical model:
 - What about “reports”
 - chronological order;
 - project/activity order.
 - What about the creation of an entities that is related with multiple other entities (e.g. an activity versus its project and the activity administration)?

/department of mathematics and computer science

SRD of SR phase

- What about “main tasks” (structuring use cases and GUI):
 1. creating/maintaining the structure (project/activities);
 2. timing (contributions/interrupts)
 - on-line (start/stop/complete);
 - off-line (add/change);
 3. generating reports (chronological + project/activity).

/department of mathematics and computer science

SPMP*

- What about the last phase (SR):
 - effort consumption per task (per person)
- What about the “status” of the risks and measures
- What about the next phase (AD):
 - list of deliverables;
 - task assignment;
 - effort estimation for each task and deliverable;
 - (risk analysis).

/department of mathematics and computer science

SQAP*

- Minimal required information on cover documents:
 - document-id, for management documents also **phase!**
 - group-id, date, version
 - status: e.g. *draft, proposal, accepted*
- Documentation standards
 - not only formatting information (layout/cover), but
 - also chapters (Table of Contents)
- Next phase (AD): ToC + design standards + SQA-metrics

/department of mathematics and computer science

Next phase: AD

Questions?
