

## General Comments

/Department of Mathematics and Computer Science

## 2IP50 → 2IP60

- What is needed for the URD + ATP?
  - domain model;
  - use case diagram;
  - use cases;
  - requirements:
    - functional (including description of *modes* [example 4.6])
    - constraints: quality, platform, process
- What is needed for the management documents?

/department of mathematics and computer science

## SPMP

- What about the next phase (SR):
  - list of deliverables;
  - task assignment;
  - effort estimation for each task and deliverable;
  - risk analysis.
- What about the test plan/design/execution?
- Note that *test reports* are not needed, but *testing* is req.!

/department of mathematics and computer science

## SQAP

- Minimal required information on cover documents:
  - document-id, for management documents also **phase**!
  - group-id;
  - date;
  - version;
  - status;
- For all documents: usage of standard templates
